

# Risk Assessment

## Practical approaches to COVID-19 Risk Assessments

The following recommendations are based on the practical approach to Risk Assessment outlined in the attached [Paras here](#) and the principles outlined in the COVID-19 PCC.

The following recommendations are based on the practical approach to Risk Assessment outlined in the attached Paras here and the principles outlined in the COVID-19 PCC.

<b>Identify the hazard</b>	<p>The hazard is a COVID-19 infection in a person.</p> <p>Some of the activities that could lead to infection (in the context of the PCC) are:</p> <ul style="list-style-type: none"><li>• ...</li><li>• ...</li><li>• ...</li></ul>
<b>Identify who can be harmed</b>	<p>The activities that could lead to infection are:</p> <ul style="list-style-type: none"><li>• ...</li><li>• ...</li><li>• ...</li></ul> <p>_____</p> <p>_____</p> <p>_____</p> <p>_____</p>

<p><b>Decide the level of risk (with control measures)</b></p>	<p>To assess the level of risk, consider the following factors:</p> <ul style="list-style-type: none"> <li>The nature of the activity and the number of people involved.</li> <li>The location of the activity and the ventilation of the space.</li> <li>The duration of the activity and the frequency of contact between people.</li> <li>The health status of the people involved.</li> <li>The effectiveness of the control measures in place.</li> </ul> <p>Assess the risk of COVID-19 transmission based on the above factors.</p>
<p><b>Review existing measures that may need to be strengthened</b></p>	<p>Consider the following measures that may need to be strengthened:</p> <ul style="list-style-type: none"> <li>Physical distancing and the use of barriers.</li> <li>Hand hygiene and the use of hand sanitizer.</li> <li>Face mask use.</li> <li>Ventilation and air filtration.</li> <li>Screening for COVID-19 symptoms.</li> </ul>
<p><b>Keep your workforce and people informed</b></p>	<p>Make sure that your workforce and other people involved are informed of the risk and the measures in place to reduce the risk of COVID-19.</p> <p>Keep people informed of any changes to the risk assessment and the measures in place.</p>
<p><b>Stay up to date with guidance</b></p>	<p>Guidance on risk management for COVID-19 is constantly changing. Stay up to date with the latest guidance from the relevant authorities.</p> <p>Make sure that your workforce and other people involved are informed of any changes to the risk assessment and the measures in place.</p>
<p><b>Keep a record</b></p>	<p>Keep a record of the risk assessment and the measures in place. This record should be reviewed regularly and updated as needed.</p> <p>Keep a record of any changes to the risk assessment and the measures in place.</p>

## Different types of COVID-19 Risk Assessments

Since the beginning of the pandemic, many organizations have created their own risk assessment frameworks to manage the risks of COVID-19.

The following are some of the risk assessment frameworks that have been used to manage the risks of COVID-19 and their respective strengths.

One of the most common frameworks used is the **Swire Car's Facb Group**. It is a risk assessment framework that is based on the **Facb Group** model. It is a risk assessment framework that is based on the **Facb Group** model.
